By Skilled Trades-People  
On State of the Art Equipment.

Competitive Prices • Responsive Quotes • Service  
From PRO MAC'S CAD facilities to our CNC centers-  
we have the resources to fit your needs.

PRO MAC has the Industry's Best Machining Techniques and Materials.

## SAW GUIDES

PRO MAC'S Saw Guides are manufactured to exact specification from approved drawings or samples.

- Competitively Priced
- Timely Delivery
- Large or Small Order Quantities Available
- Custom Made to Suit Your Specific Need

For More Information or Pricing Contact us at 1-800-665-5405

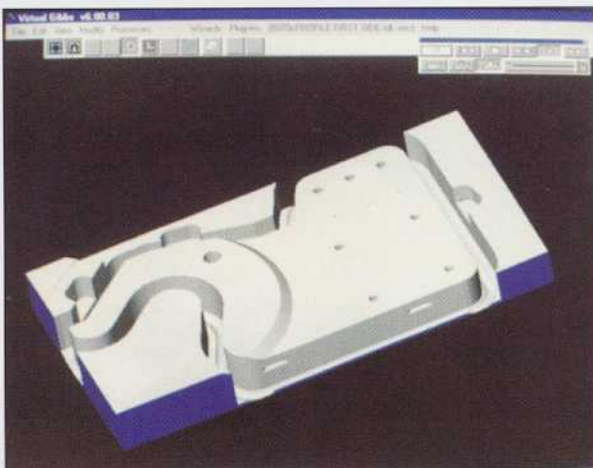

## GUIDE TYPES

HARDENED STEEL FEATURES:

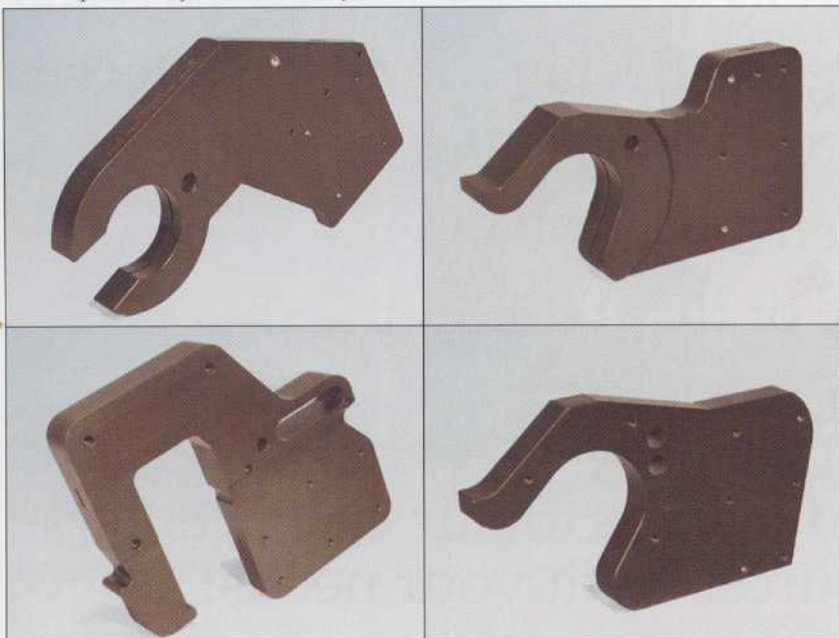

- Ideal for Thin or Shifting Guides
- Rugged and Long Lasting
- Ground for Flatness and Accuracy

ALUMINUM FEATURES:

- Aerospace Aluminum
- Hardcoated with Type 3 Engineering Hardcoat Anodized Finish
- Lighter, Easier Handling  
Less Chance for Injuries
- Lapped for Flatness and Accuracy.

CAD based CNC milling ensures quality tolerances, repeatability, and efficiency.

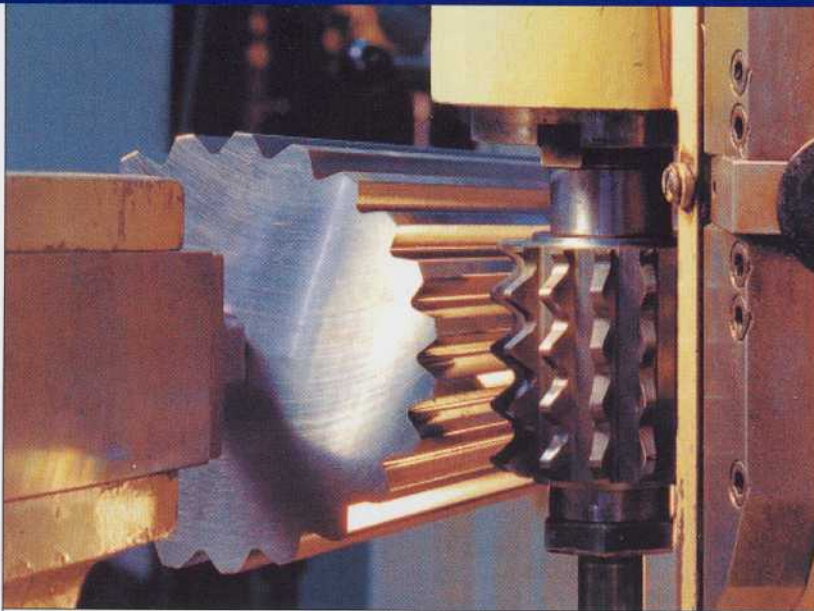

## EDGER SPLINES

OUR FULL RANGE OF SPLINES ARE:

- Created by Precision Machine Hobbing
- Manufactured from High Tensile Alloy Steel
- Hardened to 62 - 64 HRC
- Available in either Solid or Sleeved Arbor Format
- Fully Compatible with Laser Cut Saws

Hobbing Spline Shafts provides greater accuracy than index milling.

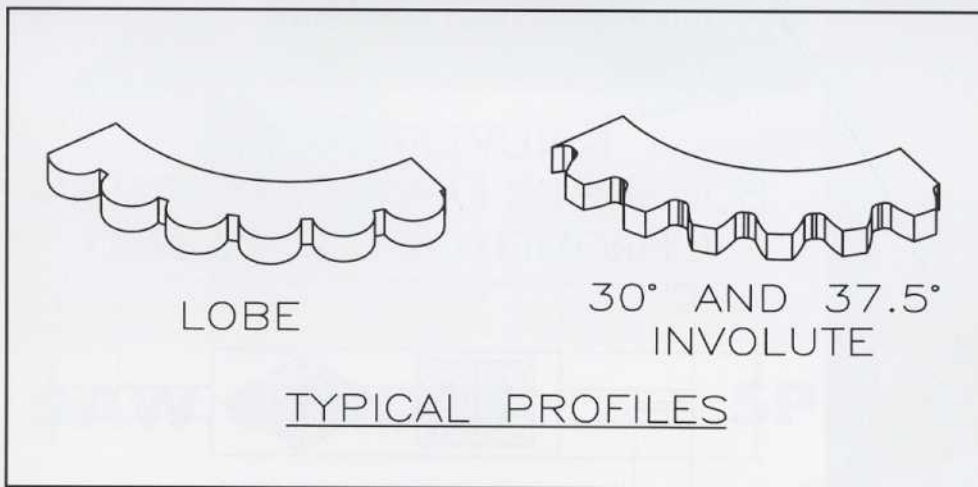

PRO MAC is One of North America's Largest Edger Arbor Manufacturers

## SPLINE TYPES

PRO MAC'S RANGE OF SPLINE TYPES INCLUDE:

- Retech Lobe
- Involute Gear
- Available in 30° or 37.5° Pressure angle

PRO MAC provides services that will identify arbor specifications and alternatives, enabling our customers to base their purchase decision with clearly defined information.

▲ Sleeved Arbors with Chrome Finish

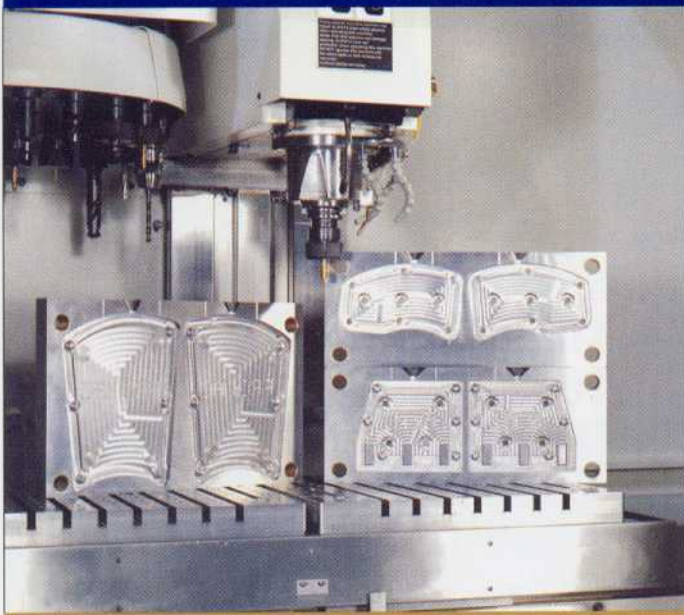

Wafer Profiles of Splines Available ▲

▼ Solid Arbors up to Ten feet in length

Sleeves for Maximum Interchangeability ▼

PRO MAC'S dedicated CNC Milling Machines create repeatable tolerances.

## BABBITT JIGS

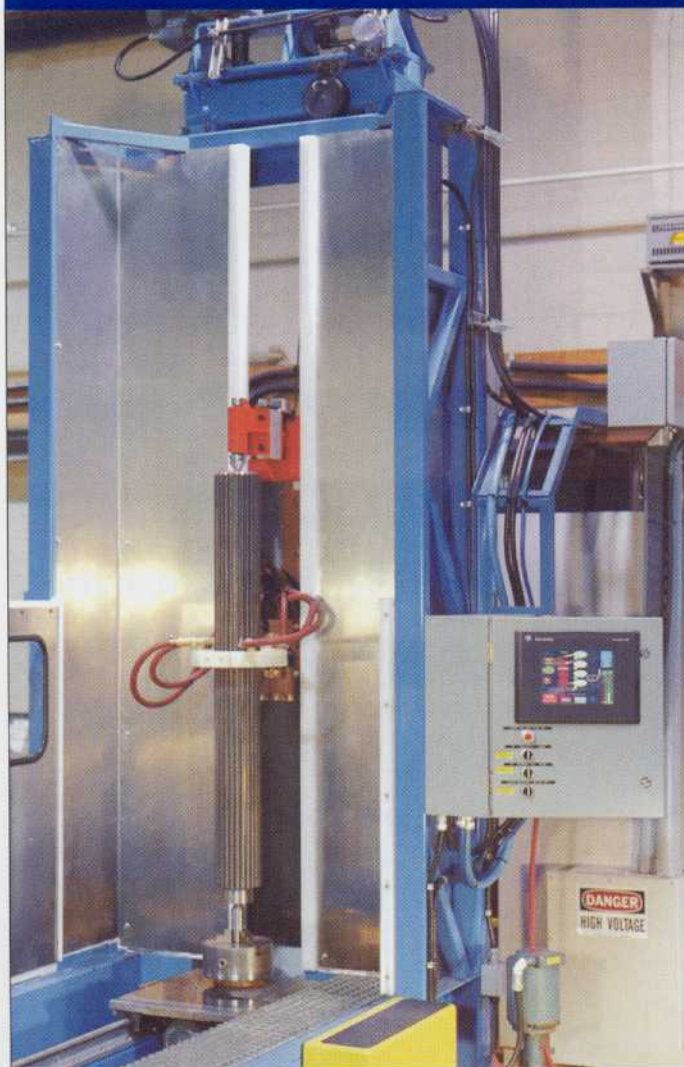

All of PRO MAC'S Custom Designs Feature:

- Double Action Air Cylinders
- Spring Activated Pusher Pins that release the pads from the mold.

PRO MAC'S Floor Style Babbitt Jig. Pads are automatically ejected to the tray shown. A Bench style jig is also available.

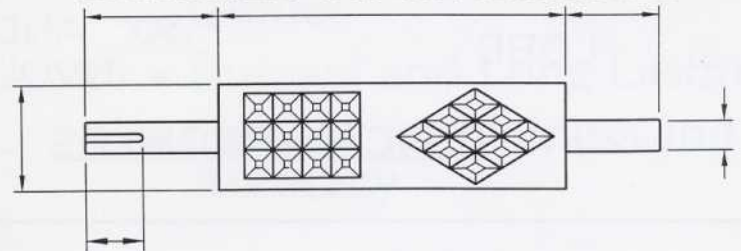

An Ordering Guideline is available by calling our toll free number or e-mail.

PRO MAC'S in house state of the art induction heat treating machine provides greater efficiency for on time delivery.

## ADDITIONAL SERVICES

KNURLED ROLLS  
SQUARE OR DIAMOND PATTERN  
CHROMED OR UNCHROMED

PRO MAC Manufacturing LTD, specializes in the manufacturing of quality Edger Replacement Parts. We also have a full facility fabrication shop, and have supplied parts or components to the Sawmill Industry from Log Infeeds to Sorters and everything in between.

**Our Corporate Values Are:**

- Close Attention to Details
- Deliver Exactly What the Customer Orders
  - Meet Specific Industry Specifications
  - Quality Workmanship
- Competitive Pricing with On Time Delivery.

We have customer references available on request and look forward to demonstrating our capabilities to you.
